In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

➔ Yes, my faculty coordinator acted as a mentor by providing guidance, checking my progress, and helping me connect academic learning with practical work.

How well were you able to accomplish the initial goals, tasks and new skills that we reset down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?
➔I achieved most goals from my learning contract, especially in React.js and Tailwind CSS. I went beyond by improving design skills and teamwork. Some goals weren't fully met due to time limitations.

In what areas did you most develop and improve?
➔I most developed and improved in building responsive UIs, writing clean React.js code, and using Tailwind CSS effectively for styling.

What has been the most significant accomplishment or satisfying moment of your internship?
➔Successfully building a complete, responsive web interface using React.js and Tailwind CSS was the most satisfying moment. Seeing my work go live and align with the team's expectations gave me a strong sense of achievement.

What did you dislike about the internship?
➔ The limited duration of the internship restricted deeper learning and exposure to more complex projects.

Considering your overall experience, how would you rate this internship? (Circle one).
(Satisfactory/ Good/ Excellent)

Give suggestions as to how your internship experience could have been improved.(Could you have handled added responsibility? Would you have liked more discussions with your professor concerning your internship? Was closer super vision needed? Was more of an orientation required?)
➔ My internship experience could have been improved with a more detailed orientation at the beginning to better understand project expectations and workflow. I would have appreciated more regular discussions with my professor to reflect on my progress. Additionally, I could have handled added responsibilities to gain deeper hands-on experience and explore more advanced frontend tasks.
